

YAHYA

SUMMARY

As an ambitious and accomplished software engineering student, I take immense pride in my proficiency in frontend development, particularly in React, Tailwind CSS, HTML, CSS, JavaScript, and Bootstrap. My dedication and passion for crafting exceptional user experiences drive me to seek opportunities where I can leverage my skills to contribute meaningfully to cutting-edge projects. I am excited to showcase my expertise in developing engaging and intuitive web applications that leave a lasting impact on users.

PROJECTS

Finance-app (<https://yahyacodes-finance-app.vercel.app/>)

- Developed a responsive and feature-rich-finance-app using React, React-router and saved the data in Firebase
- Implemented posting and deleting functionalities
- Utilized Tailwind Css for styling and ensured seamless user experience

Post-feeds-app (<https://post-feeds.vercel.app/>)

- Developed a responsive post-feed-app using React and saved the data in Firebase
- Implemented posting and deleting functionalities
- Utilized Tailwind Css for styling and ensured seamless user experience

Pokemon-app (<https://pokemon-nu-sage.vercel.app/>)

- Developed a responsive news-app using React and fetched the data from an external pokeapi API
- Had the opportunity to read the api's documentation and follow the guidelines to make the app work
- Utilized Tailwind Css for styling and ensured seamless user experience

GitHub-search-app (<https://github-search-app-neon.vercel.app/>)

- Developed a responsive GitHub-search-app using React and fetched the data from an external github-search-user-api API
- Had the opportunity to read the api's documentation and follow the guidelines to make the user search work

- Utilized Tailwind Css for styling and ensured seamless user experience

SKILLS

I am proficient in Frontend Development with expertise in:-

- Javascript (ES6+)
- React
- TailwindCss
- Bootstrap
- HTML5
- CSS3
- Git
- GitHub
- Visual Studio Code
- Npm
- Yarn

EDUCATION

Moringa School — *Software Engineering*

September 2023 - March 2024, Nairobi, Kenya

I am enrolled in a software engineering course, providing in-depth teaching and practical experience in programming languages and software development.
